

The KCLMS Core Curriculum

In words

In Y12 all students study Maths, Further Maths and Physics. There is a choice of 4th subject: Economics or Computer Science.

In Y13 all students study toward A Level Maths and Further Maths. There is a choice of a third A level in Computer Science or Physics.

There are three possible sets of qualifications at KCLMS.

If you choose 4th subject Economics:

- A levels: Maths, Further Maths and Physics (sat in year 13), and AS Economics (sat in year 12)

If you choose 4th subject Computer Science, this leads to two pathways:

- A levels: Maths, Further Maths and Physics (sat in year 13), and an independent programming qualification (sat in year 12)
- A Levels: Maths, Further Maths and Computer Science (sat in year 13), and AS Physics (sat in year 12)

You will be asked to decide in February in y12 whether you will continue with Computer Science or Physics to full A Level.
