

# **GIRLS LIKE MATHS (& PHYSICS!) SUMMER SCHOOL**

**When we say mathematics is for everyone, we mean it!  
Our Girls like Maths (& Physics!) Summer school unites  
160 female identifying year 10 students as they explore  
the wonderful world of mathematical sciences.**

Over the course of four days, you will explore exciting and new ideas outside of the traditional school curriculum, complete fun experiments, take an inspiring trip, listen to female speakers in the field, and practise your problem solving. We can promise that you will be transformed and inspired by what you learn and who you meet - an invaluable experience for anyone who enjoys maths and physics.

---

"Definitely a great experience, to understand how beautiful maths and physics are and how interesting they can be"

**Dates:** Monday 10 July to Thursday 13 July (Note that for many schools this is during term time).

**Time:** Each day will run from approximately 9.15am until 3.15pm

**Location:** King's Maths School in Lambeth (we're opposite the Imperial War Museum) + a day trip to an exciting location!

---

The summer school is completely free, and lunch will be provided.
